

In the Community

Retreat has been working with the veteran community for years at our facilities in Pennsylvania, Florida and Connecticut. We offer specific tracks that address common challenges our veterans face, such as Trauma, PTSD, Grief and Loss.

We also employ veterans at our facilities in clinical roles, giving patients the added benefit of working with someone who knows their struggles first hand.

OUR MISSION

Our Mission is to provide compassion, respect and acceptance to individuals, families and the communities we serve.

CARING FOR OUR VETERANS

www.RetreatBehavioralHealth.com

About Us

From medically monitored detox and residential rehabilitation to outpatient programs, we provide a full continuum of care. Retreat works with most commercial insurance companies, offering 24/7 admissions and complimentary transportation.

We have locations in Lancaster County, PA, Palm Springs, FL, and New Haven, CT. At Retreat we pride ourselves in providing a compassionate and spiritual environment for those struggling with substance use disorders in a secure and comfortable setting with dedicated and caring staff.

WHAT SETS US APART

Retreat is uniquely positioned to treat veterans; from offering specific tracks that address common challenges for Vets, such as trauma, PTSD, grief and loss as well as having veterans on our clinical staff at both our facilities.

Healing Our Heroes

Our nursing and medical team will work with each patient to address their individual needs and medical co-morbidity. Each patient also has the chance to meet with the nursing management to facilitate their medical needs with their home VA.

In addition to substance abuse treatment, each veteran has the opportunity for psychiatric evaluation and medication management, chronic pain treatment, pharmacological and non-pharmacological approaches, individual massage, medication assisted recovery (such as vivitrol injection), smoking cessation, and other holistic options. We are able to accept pregnant veterans up to 34 weeks (not on methadone maintenance).

We do request that VA Patients bring any medical equipment needed (ex. CPAP machine, glucometer, etc.) and medications for length of stay.

Specialized Track Programs

Each of Retreat's specialized programs offers dynamic, comprehensive treatment to a specific group based on common issues or traits that some patients share. Our programs include:

- Co-occurring Treatment Services and Counselling
- Pain Management Services
- Gender Specific
- LGBTQ
- Mindfulness
- Trauma
- Spirituality

Holistic Therapy

When you are facing problems with substance abuse, it is important to seek treatment that caters to the whole person rather than just the substance abuse. Retreat offers a wide range of alternative therapies that may be right for you, including:

- Music Therapy
- Art Therapy
- Culinary Arts
- Recreational Therapy
- Drum Therapy
- Yoga and Meditation
- Massage Therapy
- Gardening

Synergy Health Programs

At Retreat Behavioral Health, we offer a comprehensive mental health division known as Synergy Health Programs. Our focus is providing a serene environment to promote health and wellness.
